1, activity

Getting started with the app

I'll need to set up and learn to use this software – but do it quickly

2, activity

Working with lists

I'll want to work with a few different lists, so I'll need a place to see and manage all my lists

3, activity

Working with a specific list

I've got to add items into the list and mark them off as they're completed

4, activity

See notifications outside the app

It's helpful when the app reminds me about something important or tells me what others may be doing with a shared list

1.1, task

Set up the app

1.2, task

Learn to use the app

2.1, task

Review all my lists

2.2, task

Create or change a list

3.1, task

See info about a specific list

3.2, task

Work with a specific list

3.3, task

Add or change an item in a list

4.1, task

See general notifications

4.2, task

See notifications from collaborators

1.1, sub-task, detail

Supply my basic personal data

So it can be used in notifications

1.1, sub-task, detail

Turn notifications on & off

Because too many notifications can be annoying

1.1, sub-task, detail

View my favorites list

My favorite list items are items I use all the time. I'd like to view and manage this list.

1.1, sub-task, detail

Change or remove an item from my favorites

It's not a favorite item any more… or maybe I just want to add a little more information to it.

1.2, sub-task, detail

See a quick "how to" screen

I'd like to see something that shows me what the app does and how to navigate in the app

1.2, sub-task, detail

Watch a "how to" video

Something that shows me, in video form, how to use the app would be handy

2.1, sub-task, detail

See all my lists

Basic stuff like: name of the list, # of items, # of outstanding items, what else would be helpful?

2.1, sub-task, detail

See the people a list is shared with

In my list of lists, show that the list is shared, and with who

2.1, sub-task, detail

See which lists have due or overdue items

It'd be nice to not have to open up the list to see if there's something overdue in it.

2.2, sub-task, detail

Share this list with other people

I'd like to share the list with other people so they can see and work with the list

2.2, sub-task, detail

Attach a photo to a list

A photo associated with the whole list would be fun, and useful depending on the list

3.1, sub-task, detail

Copy a list

So I can use it again. This is handy for projects I repeat.

2.1, sub-task, detail

See all my lists by category

I've got lists for home, work, personal items, and some I've shared with others. I'd like to categorize them.

2.2, sub-task, detail

Create a list

Just the basics: name, description

2.2, sub-task, detail

Assign a category or "tag" to this list

I've got lots of lists – giving them a category or a tag for the type of list would help me organize them

3.1, sub-task, detail

See stats on a list

A burndown chart showing the rate that items were completed? Number of items by person?

This needs more discussion.

3.2, sub-task, detail

See my list items

When I open up my list to work with it, I'll need to see all the items in it. Seeing them in the order that they were added is a good start.

3.2, sub-task, detail

See my list items by category

I've got lots of items, organizing them into categories would help.

3.2, sub-task, detail

See my list items alphabetically

Sort items in my list alphabetically so I could find itmes in a long list.

3.2, sub-task, detail

Arrange a list in the order I want it

I'd like to put items in the order I choose – a priority order, the order I'll do tasks, or any other order that makes sense to me.

3.2, sub-task, detail

See only incomplete items

Just show me what's not been marked "done." That way it's easy to see what's left to do.

3.2, sub-task, detail

Mark an item as "done"

This should be obvious. If I can't mark it "done," what's the point of having a list on my smart phone. I can mark things "done" one paper.

3.2, sub-task, detail

Mark whole list as done

I've finished all these items, so I'd like to mark the whole list done – not mark each item one at a time.

3.3, sub-task, detail

Add an item

I'll need to add items to my list – because what good is a list with no items in it?

Just the basics: name, description

3.3, sub-task, detail

Auto-complete a list item from my history

It'd be cool if I'm entering an item that I'd entered before that the app would save me some time and typing auto-complete it

3.3, sub-task, detail

Auto-complete a list item from common grocery items

Lists knows common grocery items. That'll make it faster to build a shopping list.

3.3, sub-task, detail

Auto-complete item from common office supply items

Lists knows common office supplies. That'll make it faster to replenish office supplies

3.3, sub-task, detail

Add a photo to an item

So my spouse doesn't buy the wrong thing, or just because it would be helpful to help me find it on the shelf.

3.3, sub-task, detail

Mark an item as a favorite

So I can easily choose it later

3.3, sub-task, detail

Add an item from my favorites list

I've marked a lot of items as favorites – so let me choose items from that list to addd to the list I'm making.

3.3, sub-task, detail

Add comments or notes to an item

Something longer than just the description would be useful

3.3, sub-task, detail

Delegate an item to somone else

This list has a "to-do" in it that I need one of my collaborators to know that I'm expecting them to handle

3.3, sub-task, detail

Give an item a due date

This item is time sensitive and has a specific date that it needs to be done by

3.3, sub-task, detail

"nudge" someone about an item

Nudging is just a polite way to say "remind," or "nag." I want to remind someone that an item is due, or just send them a bit of information

4.1, sub-task, detail

See "item is due today" notification

If I've got items that are due today, it's helpful to know about it without opening my Lists app

4.2, sub-task, detail

See "a list was shared with you" notification

If someone just shared a list with me, I'd like to know

4.2, sub-task, detail

See "a new item was added to a list you share" notification

If others are adding items to a list I'm working on, I'd like to know

4.2, sub-task, detail

See "an item was completed in a list you share" notification

It'd be nice to know if someone other than me is working on and completing items in a list

4.2, sub-task, detail

See "item delegated to you" notification

If someone assigns me responsibility for an item, I want to know

Title

Description

4.2, sub-task, detail

See "you've been nudged" notification

Although I don't always like to be nagged, if someone is nagging me to finish something, I want to know. Getting a polite message from them would be nice
